To Whom it May Concern

**Yahrtzeit Board and Software Supplied by Mark Sarachik**

Mark Sarachik approached me as a member of my congregation with the idea of manufacturing and installing a yahrtzeit Board at Chabad House Carnegie. This was done as Mark felt that:

- As an immigrant, he needed to have something and somewhere tangible to commemorate the life of his late mother, in a situation where he is not able to visit the grave of his late mother z"l; and
- He felt this was a worthwhile project for the shule that would facilitate the raising of funds needed to grow the kehila.

Mark has driven the entire project and in a short amount of time he has achieved, not only what he set out to achieve but has designed, built, written software to automate and has commissioned the board.

Mark has told me that he is embarking on a project to manufacture these boards and to retro-fit existing boards with the technology he has designed.

I wish Mark every success with this venture and highly recommend this product and the services that Mark will be providing.

Kind Regards

*Z. Gutnick*
